Bioactive Compounds from Plants-Based Functional Foods

Message from the Guest Editors

Functional foods are a group of foods with exceptional nutritional characteristics that have beneficial health effects beyond those provided by basic nutrition. The concept of functional food was born in Japan with the FOSHU (Food for Special Health Use) food regulation, which aims to combat the causes of some diseases that can be attributed to the consumption of some foods. In the case of Japan, there are robust regulations that demonstrate the health properties (effectiveness) and safety of foods. In other countries, this denomination is not entirely clear, giving rise to multiple interpretations. The articles for this Special Issue should focus on original research: new sources of bioactive substances present in raw materials of plant origin, the effects of processing and shelf life, sensory aspects and commercial validation, and demonstrations of effectiveness in biological models, among others.

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando

Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
