

Special Issue

Cross Protection and Biocontrol of Plant Viruses and Viroids

Message from the Guest Editors

The Special Issue "Cross Protection and Biocontrol of Plant Viruses and Viroids" aims to gather the latest information and innovations in the field of research on the identification and mechanisms of biological agents that induce plant immunity against viral infections. As we all know, plant viruses pose a significant threat to agricultural production, causing considerable economic losses and reducing crop yields. Fortunately, recent research has shown that cross-protection and plant growth-promoting organisms offer promising solutions to this problem. Therefore, this Special Issue aims to compile the latest information and innovations in the field of research on the identification and mechanisms of biological agents that induce plant immunity against viral infections. We welcome papers that focus on introducing mild strains and addressing the pathogenicity or symptom determinants of plant viruses, as well as those that investigate the mechanisms of cross-protection as a biological control method. We believe that this Special Issue will be an excellent opportunity for researchers to share their work and advance the field of plant virology. We look forward to your submissions.

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando

Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
