

Special Issue

Epidemiology and Control of Plant Diseases II

Message from the Guest Editor

It is noteworthy that some plant disease epidemics are currently having devastating effects on food and forestry heritage losses around the world. A better knowledge of pathogen epidemiology and the correct technical placement of control measures could better satisfy the growing interest in strategies that promote a rational and sustainable approach for plant disease management. Researchers are invited to investigate epidemiological cycles of airborne and soilborne plant pathogens with the aim of ensuring good agricultural productivity, maintaining the effective management of plant diseases and, simultaneously, good economic and environmental sustainability. This Special Issue will underline the performances of new eco-sustainable means of control to increase our knowledge of plant pathologists, international scientific communities, and industries and will provide a better understanding of the mode of action and timing application procedure of control means in different soil–plant systems. In addition, an early and in-depth understanding of plant disease epidemiology is needed to better anticipate the challenges ahead and to relate directly with disease control strategies.

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
