

## Special Issue

# Plant and Microbe Adaptations to Cold

### Message from the Guest Editors

In the current climate change era, plants are likely to be impacted more than ever by temperature fluctuations. Adaptation to cold environments remains one of the main research topics in plant science. This topic has been discussed in a series of international conferences entitled “Plant and Microbe Adaptations to cold (PMAC)”. Unfortunately, the meeting has been deferred indefinitely since it last convened in Seattle in 2016. However, the demand for interdisciplinary discussion to solve the complex issues associated with cold adaptations worldwide has led us to think about a novel alternative discussion platform to holding a conventional conference. Special issues of journals can be a collection of dispersed information and enhance intensive discussion. We therefore decided to open a Special Issue focused on plant and microbe adaptations to cold in *Plants*. This Special Issue will accept papers from a broad scope on plant and microbial adaptations to cold environments, ranging from basic molecular biology to breeding. Ecological and meteorological studies in this area fall within the scope.

## About the Journal

### Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
