

Special Issue

Rheology and Processing of Polymers II

Message from the Guest Editors

This Special Issue “[Rheology and Processing of Polymers II](#)” will cover the latest developments in the field of rheology and polymer processing, and highlight cutting-edge research focusing on the processing of advanced polymers and their composites. It will demonstrate that the field of “Rheology and Polymer Processing” is still gaining increased attention. This Special Issue promises to maintain a good balance of papers to serve the attendees from academia and industry. It will provide cutting-edge research results and the latest developments in the field of polymer science and engineering, their innovative processing, biopolymers, and characterization, polymer-based products, polymer physics, composites, modeling and simulations, and rheology. Ideally, contributions should focus on fundamental and experimental results in a thematic range that comprises conventional processing technologies as well as innovative processing and materials-based macromolecular research. The issue will compile the current state-of-the-art and highlight the range of applications. Both original contributions and reviews are welcome.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of
Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
