

Special Issue

Advanced Polymer Composite Materials: Processing, Modeling, Properties and Applications

Message from the Guest Editors

Polymer-based composites are often a valid alternative to traditional materials, because they combine mechanical resistance to lightness, flexibility to optical properties, formability to low cost processing. Due to their peculiar properties and versatility polymer-based composites, they have found applications in many industrial fields: construction, automotive, aerospace, biomedicine, marine, just to name a few. The purpose of this Special Issue is to highlight the latest original results in the development of advanced composite materials based on synthetic/natural polymers and synthetic/natural (nano)fillers/fibers, with improved properties required by the foreseen different applications. As a consequence, the present Special Issue represents the right channel to publish on cutting-edge applications related to advanced polymeric composite materials. All kinds of polymer matrices, either commodity and engineering polymers or newly developed ones, such as bio-based and/or biodegradable polymers, from thermosets and thermoplastics to vitrimers, can be considered.

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of
Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
