Advances in Fiber Reinforced Polymer (FRP) Composites: Processing and Properties

Message from the Guest Editors

In the 21st century, composites have been recognized as the most promising and diverse materials available on the world market. Fiber-reinforced polymer (FRP) composites have received considerable attention from academicians, scientists, and researchers due to the development of novel synthesis approaches and to their excellent properties. FRP composites are characterized not only by a high strength-to-weight ratio but also by exceptional qualities, such as high stiffness, durability, flexural strength, and damping properties, and good resistance to wear, corrosion, impact, and fire. These diversified features have allowed multipurpose applications of FRP composites in various fields, including mechanical and structural engineering and aerospace, marine, automobile, biomedical, and many other manufacturing industries. The main aim of this Special Issue is to provide a platform for academicians and researchers worldwide to publish their work on natural/synthetic fibers and the processing and properties of FRP composites. Research and review articles, along with short communications, are invited for this Special Issue.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Since its foundation in 2009, *Polymers* has developed into an internationally renowned, extremely successful open access journal. The editorial team and the editorial board dedicatedly combine open-access publishing and high-quality rigorous peer reviewing. The performance of the journal has proven this strategy to be well-suited and highly successful. This is reflected in the increasing impact factor of *Polymers*, the most recent one being 4.7.

I would like to invite you to contribute to the success of the journal by sending us your high quality research papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Alexander Böker

Lehrstuhl für Polymermaterialien und Polymertechnologie, University of
Potsdam, 14476 Potsdam-Golm, Germany

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, FSTA, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q1 (Polymer Science) / CiteScore - Q1 (General Chemistry)
