

Special Issue

Novel Fuel Technologies: Synthesis, Production and Property Analysis

Message from the Guest Editors

Given the growing concerns about air pollution and global warming, increasingly strict regulations have been released to restrain the pollutants and carbon dioxide emitted by burning fossil fuels. Novel fuels which are produced from renewable resources or emit lower pollutants have the potential to reduce pollutant and carbon emissions if widely applied in many industries. Consequently, the properties and performance of these novel fuels are of paramount importance prior to commercialization. This Special Issue, titled “Novel Technologies: Synthesis, Production and Property Analysis”, seeks high-quality works focusing on the synthesis, production and properties of newly developed fuels. Topics include the following:

- Renewable/alternative fuels, e.g., biofuels, synthetic fuels, hydrogen, carbon-free fuels, etc.
- Fuel production and properties.
- Spray and combustion.
- Pollutant emissions.
- Engines and generators.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q2 (Chemical Engineering (miscellaneous))
