

## Special Issue

# Numerical Simulation and Application of Process in Deep Mining Engineering and Petroleum Engineering

### Message from the Guest Editors

With the utilization of underground space, the development of underground power stations, the development of mineral resources and energy sources, and transportation, the research on rock mechanics will increasingly turn towards an underground focus. Therefore, more attention will be paid to problems related to underground engineering in the future, such as rapid construction technology, rock burst, gas explosion, and in situ monitoring of surrounding rock. This Special Issue, entitled “Numerical Simulation and Application of Process in Deep Mining Engineering and Petroleum Engineering”. Topics include, but are not limited to, methods and/or applications in the following areas:

- Efficient numerical simulation method for rock mechanics.
- Numerical simulation of rock and soil mass behavior under different loading conditions.
- Modeling of soil–fluid interaction and its influence on rock behavior.
- Computational geomechanics for underground excavations and tunnels.
- New construction techniques and engineering applications in geotechnical engineering.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q2 (Chemical Engineering (miscellaneous))
