

Special Issue

AC and DC Power Grids System Technologies: Analysis, Control and Practical Applications

Message from the Guest Editors

This issue deals with new technologies for artificial intelligence and advanced technologies for power systems and renewable energy systems, including state-of-the-art research in AC and DC power grids, renewable energy technologies, artificial intelligence, high power DC/DC converters, power electronics converters, fault detection and diagnostics, intelligent power systems and grids, power and energy systems, AI-based methods, sensor-based control, battery energy storage system, vehicle-to-grid, and grid-to-vehicle. These studies are established to improve the strength of power and renewable systems.

Guest Editors

Prof. Dr. Chang-Hua Lin

Dr. Shiue-Der Lu

Dr. Hwa-Dong Liu

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q2 (Chemical Engineering (miscellaneous))
