

Special Issue

Activated Carbon: Contaminant Removal for Environmental Sustainability

Message from the Guest Editors

This Special Issue aims to collect studies concerning the preparation methods, characterization, modification, regeneration, and application of activated carbon in water treatments. Contributions (original research papers and review articles) will encompass the production of activated carbons from new precursors, such as biomass or synthetic materials, as well as their applications regarding drinking and wastewater treatment.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
