New Insight in Enhanced Oil Recovery Process Analysis and Application

Message from the Guest Editors

This Special Issue on “New Insight in Enhanced Oil Recovery Process Analysis and Application” aims to gather and promote new insights in the development and application of enhanced oil recovery methods to improve oil development performance in harsher reservoirs. Topics include, but are not limited to:

- Chemical flooding methods;
- Thermal oil recovery methods;
- Cold production methods for heavy oil reservoirs;
- Multiphase seepage flow in enhanced oil recovery;
- Intelligent oil production optimization.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
