Innovations in Sewage Treatment Focused on Global Environmental Challenges

Message from the Guest Editors

Wastewater treatment (domestic, industrial, hospital) is one of the most important environmental technologies. Today's water treatment technologies must be considered from the perspective of the big picture, horizontal and vertical comprehensiveness: origin and transport of wastewater, purification, reuse, inclusion in water receivers, distribution of volatile pollutants and odors in the air, and carbon dioxide emissions. Particular attention is paid to the control of those hazards that remain after treatment and pass into the water receivers, or remain in the water for reuse and damage human health and greatly reduce biodiversity. Significant emphasis is placed on deep (solving problems at the micro- and nano-level) and high technologies and biotechnologies (including modern analytical systems, biosensors, microchips, specialized software, and artificial intelligence) for solving the above-mentioned global problems.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q2 (Chemical Engineering (miscellaneous))
