

Special Issue

New Trends in Renewable and Conventional Energy Applications in Thermal Processes

Message from the Guest Editors

This Topic aims to highlight the importance of recent developments in renewable and conventional energy to mitigate the energy dependence, specifically on natural gas, in the thermal processes of heating industrial, commercial or domestic buildings, including greenhouses for food production, schools or home buildings. Additionally, space cooling processes, mainly supported by vapor compression solutions, should benefit from recent developments in renewable and conventional energy. The purpose of the Topic is to explore new approaches, mainly supported by renewable energies, that allow a reduction in energy consumption, namely through the improvement of its use in the different thermal processes of heating or cooling.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q2 (Chemical Engineering (miscellaneous))
