

## Special Issue

# Control and Optimization of Alcoholic Fermentation and Extraction Technology

### Message from the Guest Editors

The control and optimization of alcoholic fermentation and extraction technology is a very important issue given the many different products that it is possible to develop and the undeniable increasing awareness of industries, retailers, and consumers regarding the quality parameters of the products. In this context, this Special Issue will focus on alcoholic beverages—namely, wines, spirits, beers, wines, and others resulting from a fermentation process, followed or not by a distillation, including the following aspects, among others:

- Fermentation process, optimization and control;
- Raw materials;
- Distillation process;
- Ageing technologies;
- Brewing;
- Physicochemical and sensory characterization of fermented and distilled beverages.

---

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q2 (Chemical Engineering (miscellaneous))
