Application and Development of Disease Diagnosis Microbiology Technology

Message from the Guest Editors

Technological microbiology is an important issue today. This technological microbiology was incorporated with biotechnological techniques that allowed the rapid identification of new molecules and microorganisms or even the genetic improvement of known microorganisms. Commonly, the participation of microorganisms in the generation of medical products or services involves four distinct aspects, i.e., disease control, vaccine production, antibiotic production, and biotherapeutic production. In this Special Issue, the application and development of disease diagnosis microbiology technology will be discussed in the disease control field in detail.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q2 (Chemical Engineering (miscellaneous))
