

Special Issue

Physical, Chemical and Biological Processes in Energy Geoscience

Message from the Guest Editors

The formation, occurrence, and flow processes of natural gas in the multiscale reservoirs are becoming new hot research topics. In addition, the fluids behaviors of oil, gas, and water in porous media and the associated complex physical, chemical, and biological processes will be particularly important for geo-energy exploration and exploitation together with the carbon capture, utilization, and storage. We therefore call for submissions to be included as part of a Special Issue covering the new advances in physical, chemical, and biological processes in energy geoscience, especially for unconventional gases and geothermal energy. Novel, original research articles and reviews are all welcomed. Potential topics include but are not limited to the following: 1. Depositional and diagenetic processes of geo-energy reservoirs. 2. Formation and evolution mechanism of pores and fractures. 3. Characterization of organic and mineralogical properties of unconventional geo-energy. 4. Fluids flow behaviors in porous media under geological conditions. 5. Exploration, development, and utilization of geo-energy resources (including oil, gas, and geothermal resources).

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q2 (Chemical Engineering (miscellaneous))
