

Special Issue

Advances in Sol-Gel Processes

Message from the Guest Editors

This Special Issue is part of the development of materials with controlled morphology and texture synthesized by the sol-gel process. The developed methodology in this Special Issue should integrate aspects related to the microstructure of the material, characterization of the end-use properties of the final material, and design of the manufacturing process from the laboratory to the industrial scale. This objective requires combining synthesis work, characterization work, and modeling work.

Guest Editors

Dr. Stéphanie Lambert

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q2 (Chemical Engineering (miscellaneous))
