

Special Issue

Advances in Antioxidant Extraction Processes

Message from the Guest Editors

This special issue on “Advances in Antioxidant Extraction Processes” will foster recent advances in extraction processes, with emphasis on advantages of using green extraction processes over conventional ones, and their integration with aim to improve recovery of targeted antioxidants and/or to diminish consumption of resources. In order to boost impact, authors contributing to this Special Issue will be invited to deliver high quality studies focusing on recovery of phenols, flavonoids, anthocyanins, vitamins and other representatives of antioxidants by employing emerging green extraction processes. Topics include, but are not limited to:

- The development of integrated green extraction processes with aim to improve extraction yield of antioxidants
- The optimization of current extraction processes with defining dominant process parameters contributing to antioxidants concentration
- The comprehensive evaluation of advances in extraction processes of natural antioxidants
- The strategies on how to scale-up green extraction processes

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q2 (Chemical Engineering (miscellaneous))
