

Special Issue

Air Quality Monitoring for Smart Cities and Industrial Applications

Message from the Guest Editors

Today, the importance of air quality is a topic in which it is extremely important to invest in terms of research activities. Indoor and outdoor quality monitoring systems are well accepted for contribution in this Special issue, together with critical reviews describing the problems in terms of pollution and their link with human health prevention. The topics of this Special Issue will include, for example:

- Treatment of gaseous waste from industry;
- Development of conventional and novel equipment for the monitoring of the main air quality parameters;
- Critical analysis of the outdoor air quality, industrial, motor vehicle and incinerator emissions, economic analysis;
- Indoor air quality in a working environment, in case of poor ventilation;
- Health impact of air pollution.

This issue is also open to health scientists proposing their studies on the effect of air pollutants on patient health, especially during this COVID-19 pandemic outbreak.

Guest Editors

Dr. Daniele Sofia

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q2 (Chemical Engineering (miscellaneous))
