

Special Issue

Renewable Energy in Environmental Engineering

Message from the Guest Editors

The recent interest in environmental engineering problems has led to the development of techniques and technologies to reduce atmospheric pollution; improve water management and treatment; and rationalize waste treatment, disposal, and management. This Special Issue, “Renewable Energy in Environmental Engineering”, aims to gather contributions that deal with advances in environmentally clean technologies, renewable energy, and sustainable development. Topics include, but are not limited to, the following:

- Sustainable development;
- Environmental protection;
- Atmospheric pollution;
- Environmental impact;
- Renewable energy;
- Water management;
- Waste management;
- Solar technologies.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
