Application of Environmentally Friendly Technologies in Green Processes

Message from the Guest Editors

This Special Issue on “Application of Environmentally Friendly Technologies in Green Processes” aims to curate novel advances in the development and application of green processes in the field of the treatment of wastewater and organic micropollutants in the factory of the future. Topics include but are not limited to:

- Development of new green catalysts;
- Improvement of biological treatment through the addition of biochar;
- Production of bioenergy combined with wastewater treatment;
- Biobased materials in wastewater treatment.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.
