Tailoring Polymeric Materials for Specific Applications

Message from the Guest Editor

This Special Issue on “Tailoring Polymeric Materials for Specific Applications” aims to curate novel advances in the design and development of polymeric materials and composites for a multitude of applications. Topics include but are not limited to:

- Development of new polymeric materials for a target application;
- Design processes for tailoring a new polymeric material for a specific application;
- Specialty polymers for specific applications;
- Upcycling recycled polymers and their uses.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief
