

Special Issue

Process Systems Engineering à la Canada

Message from the Guest Editors

The [Canadian chemical engineering community](#) (CSChE) has a long history of excellence in process systems engineering research and practice involving applied statistics and process design, control, and optimization. Each year, this community gathers at the Canadian Chemical Engineering Conference to hear presentations based on work being done in the process systems engineering field on topics of relevance and importance to the chemical engineering community. This Special Issue is being coordinated with the 68th such conference that is being held in conjunction with the [XXIX Interamerican Congress of Chemical Engineering](#) in Toronto, Canada on October 28–31, 2018.

This Special Issue focuses on, but is not limited to, papers that align with the “Systems and Control” thematic sessions of this conference:

- Data analytics;
- Data science;
- Design of sustainable processes;
- Optimal control.

Guest Editors

Prof. William R. Cluett

Prof. Dr. Michel Perrier

Prof. Dr. Ana Inés Torres

Prof. Dr. Simant Upreti

About the Journal

Message from the Editor-in-Chief

You are invited to contribute either a research article or a comprehensive review for consideration and publication in *Processes* (ISSN 2227-9717). *Processes* is published in open access format – research articles, reviews, and other content are released on the internet immediately after acceptance. The scientific community and the general public have unlimited, free access to the content. As an open access journal, *Processes* is supported by the authors and their institutes through the payment of article processing charges (APCs) for accepted papers. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Giancarlo Cravotto

Department of Drug Science and Technology, University of Turin, Via P. Giuria 9, 10125 Turin, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Chemical) / CiteScore - Q2 (Chemical Engineering (miscellaneous))
