Message from the Guest Editors

This Special Issue focuses on the latest advancements in prosthetic rehabilitation, addressing the unique needs of oral cancer survivors. It encompasses a range of topics: the evaluation of risk factors associated with lifestyle, the exploration of minimally invasive therapeutic techniques, and the pioneering of biocompatible and eco-friendly prosthetic materials. Our objective is to foster a collaborative environment where researchers, clinicians, and academic groups can exchange insights, experiences, and breakthroughs. By disseminating original research, clinical reports, and comprehensive reviews, we aim to enhance patient outcomes and quality of life for oral cancer patients through innovative prosthetic solutions.
