

## Special Issue

# Citizen Science and Earth Observation II

### Message from the Guest Editors

The term citizen science is used when scientific work is performed partially or completely by volunteers, which are usually non-experts. During the last decade, citizen science and projects which are based on user-generated content have dramatically increased. Citizen science in the field of Earth observation has started more recently and a number of projects have evolved which involve citizens in monitoring the environment. Furthermore, citizen-based observations can support earth observation in a number of different fields such as climate change, sustainable development, drought monitoring, land cover or land-use change. Moreover, there is the potential to use citizen-based observations in combination with other currently increasing earth observation data from new sensors such as the Sentinel family of satellites and Landsat. The proposed special issue welcomes contributions in the field of Earth observation and its applications. Dr. Cidália Costa Fonte

## About the Journal

### Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

#### Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
