

## Special Issue

# Earth Radiation Budget

### Message from the Guest Editor

The Earth Radiation Budget (ERB) at the top of the atmosphere describes how the Earth gains energy from the Sun and loses energy to space through reflection of solar radiation and the emission of thermal radiation.

The ERB is measured from space with dedicated remote sensing instruments. Its long-term monitoring is of fundamental importance for understanding climate change. The most fundamental quantity to be monitored is the Earth Energy Imbalance, which is closely related to Ocean Heat Content. In periods of increasing atmospheric aerosol load, there appears to occur a shift in the natural El Niño/La Niña oscillation towards a preferred La Niña state. This corresponds to a decrease in the global temperature rise and regional shifts in the tropical precipitation. For this Special Issue, original contributions are invited focusing on ERB remote sensing instruments for either

- the establishment of past and current ERB Climate Data Records (CDRs)
- the outlook for continued or improved future ERB monitoring
- insight in climate change gained from the analysis of ERB CDRs.

## About the Journal

### Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

#### Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
