

## Special Issue

# GNSS-R Earth Remote Sensing from SmallSats

### Message from the Guest Editors

Small satellites are changing the paradigm in Earth remote sensing, taking advantage of innovative payloads. As such, the operation of constellations of these instruments has the potential to observe Earth's dynamic processes with a higher spatio-temporal sampling than traditional techniques. In particular, the so-called Global Navigation Satellite Systems Reflectometry (GNSS-R) is a sort of L-band passive multi-static radar that provides a wide swath up to ~1500 km. GNSS-R spatio-temporal sampling properties could open new process insights on several research topics. New and novel GNSS-R scientific applications, methodologies, and retrieval algorithms are the focus of this Special Issue, including contributions from academia, international space agencies, and private industry. Works arising from present and future GNSS-R missions are invited to participate in this scientific forum:

- CYGNSS
- BuFeng-1
- Spire CubeSats series
- Fengyun-3 series
- FSSCat
- PRETTY
- Triton
- HydroGNSS

---

### Guest Editors

Dr. Hugo Carreno-Luengo

NASA CYGNSS Mission, Climate and Space Sciences and Engineering Department, University of Michigan, Ann Arbor, MI 48109, USA

Dr. Chun-Liang Lin

1. National Space Organization, Taiwan
2. Electrical Engineering Department, National Chung Hsing University, Taiwan

---

### Deadline for manuscript submissions

## About the Journal

### Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

---

### Editor-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

#### Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
