

Special Issue

Remote Sensing to Assess Canopy Structure and Function

Message from the Guest Editor

The canopy is a fundamental component of vegetation. The structure of the canopy has a critical role in the many functional properties of vegetation. Structure not only constrains and indicates functions but also is often easier to measure than function. Understanding the links between structure and function can be critical for scaling and modelling. Here, we define canopy structure as the arrangement of the aboveground components of vegetation in time and space. We invite submissions for a special issue targeted at remote sensing of the interconnections of canopy structure and function. The submissions can be based on various platforms, sensors, vegetation types, structural and functional attributes of interest.

About the Journal

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

Editor-in-Chief

Dr. Prasad S. Thenkabail

Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
