

Special Issue

Instruments and Methods for Ocean Observation and Monitoring

Message from the Guest Editors

This Special Issue aims to investigate matters relating to: 1) technologies for sea observation and monitoring (waves, currents, bathymetry, wind); 2) monitoring of water chemical and physical parameters; 3) assimilation of marine coastal and deep environment data into numerical models; 4) technology and techniques for oil spill detection and analysis; 5) technologies and techniques for ships and objects detection.

About the Journal

Message from the Editor-in-Chief

Remote Sensing is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.
