# Special Issue

## Remote Sensing of Night Lights – Beyond DMSP

### Message from the Guest Editors

Nightlight remote sensing enables monitoring human activity from space. Since the 1990s, the DMSP/OLS sensors have been widely explored to quantify the relationships between nighttime brightness and human activity as well as socio-economic variables. In the last decade, new sensors offer better spatial, temporal and radiometric resolution than DMSP/OLS. This special issue aims to highlight novel research going beyond DMSP/OLS, emphasizing on topics of (but not limited to):(1) The potential of new sensors to quantify night-time brightness at fine spatial and temporal resolutions; (2) Generation of products from the VIIRS/DNB sensor; (3) The correspondence between ground observations of artificial lights as well as light pollution and space borne measurements of nighttime brightness; (4) The spectral and directional properties of artificial lights; (5) Estimation of light pollution and human health impacts.

### Guest Editors

Prof. Dr. Noam Levin

Dr. Christopher Kyba

Prof. Dr. Qingling Zhang

### Deadline for manuscript submissions

closed (30 September 2018)

# About the Journal

## Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

## Editor-in-Chief

Dr. Prasad S. Thenkabail
Senior Scientist (ST), U. S. Geological Survey (USGS), USGS Western Geographic Science Center (WGSC), 2255, N. Gemini Dr., Flagstaff, AZ 86001, USA

## Author Benefits

**Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:**

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

**Journal Rank:**

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
