

## Special Issue

# Remote Sensing for Environmental Health: From Fine-Scale Measurement towards Dynamic Exposure Assessment

### Message from the Guest Editors

Living environments have been well demonstrated to have significant impacts on human health. In the context of climate change and urbanization, scientific evidence to aid a comprehensive understanding of how people are exposed to their ambient physical and social environments is a critical requirement for preventing disease and reducing environmental health inequalities. The advances in remote sensing, combined with social sensing and GeoAI techniques, provide additional insights to investigate patterns of human–environment interaction through fine spatial–temporal scale and dynamic ways. This Special Issue of *Remote Sensing* aims to gather original articles and reviews showing practical applications of remote sensing in different areas of environmental epidemiology/health studies as well as exposure assessment studies.

## About the Journal

### Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases.

#### Journal Rank:

JCR - Q1 (Geosciences, Multidisciplinary) / CiteScore - Q1 (General Earth and Planetary Sciences)
