

Special Issue

Endometrial Cancer and Fertility

Message from the Guest Editors

The incidence of endometrial carcinoma (EC) is increasing in resource-abundant countries due to increased obesity and longer life expectancy. Fertility preservation in patients with EC is a very important and interesting topic. This Special Issue, entitled “Endometrial Cancer and Fertility”, will present studies in fields related to endometrial cancer and fertility preservation. We are pleased to invite you to contribute to this Special Issue on the potential value and impact of endometrial cancer with original contributions and review articles focusing on recent and related advances in the field, including the latest trends and future developments.
