

Special Issue

Theoretical and Practical Approaches in Watershed Management across Different Environmental Contexts

Message from the Guest Editors

This Special Issue aims to attract contributions from scientists working in different climatic, geomorphological, and ecological contexts, in order to (i) analyse the availability of tools providing a better comprehension of watershed physical and biological processes (hydrological models, techniques for processing geographical information, laboratory experiments, design methods, etc.) and (ii) propose new strategies for the sustainable management of watershed resources (soil, water, vegetation, etc.). Papers focusing on the state-of-the-art of specific issues (such as reviews and discussions), as well as research and applied projects (as, for instance, successful/unsuccessful case studies) about the rehabilitation and restoration of natural resources in degraded watersheds, are welcome. We also encourage studies targeted at setting up new guidelines and design criteria for watershed management, especially regarding land planning and hydrogeological/ecological risk management.

Guest Editors

Dr. Demetrio Antonio Zema

Department of Agricultural Science (AGRARIA), Mediterranean University of Reggio Calabria, 89127 Reggio Calabria, Italy

Dr. Manuel Esteban Lucas-Borja

Department of Agroforestry Technology and Science & Genetics, School of Advanced Agricultural & Forestry Engineering, Castilla La Mancha University, Campus Universitario s/n, C.P. 02071 Albacete, Spain

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Responsible prosperity is underpinned by sustained access to resources. *Resources*, publishes excellent science and scholarship which transforms understanding, practices and policies for conserving all natural resources—from water, land and air; to plant and animal biodiversity; to minerals and energy and their interconnection across scales. Significantly, we invite high quality submissions from natural and social sciences.

Build impact from your research by submitting to *Resources*, an open-access journal connecting you with data, insights, ideas and evidence needed to shape a better world.

Editor-in-Chief

Prof. Dr. Benjamin McLellan
Graduate School of Energy Science, Kyoto University, Yoshida-honmachi, Sakyo-ku, Kyoto 606-8501, Japan

Author Benefits

High Visibility:

indexed within Scopus, ESCI (Web of Science), GeoRef, PubAg, AGRIS, RePEc, and other databases.

Journal Rank:

JCR - Q2 (Environmental Sciences) / CiteScore - Q1
(Nature and Landscape Conservation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 33.4 days after submission; acceptance to publication is undertaken in 4.6 days (median values for papers published in this journal in the first half of 2024).
