

Special Issue

Focus on Humans in a Technological World: Selected Papers from the Working on Safety 2022 Conference

Message from the Guest Editors

This Special Issue is an output of the WOS 2022 conference (WOS.net), an international network of decision makers, researchers and professionals responsible for the prevention of accidents and trauma in the workplace. The latest findings and best practices for different countries and sectors are discussed herein. This Special Issue focuses on the study of humans in an increasingly technological world, addressing the two spheres that currently overlap in the workplace: traditional occupational-related issues, such as accident prevention and forensics, company-based safety management systems, education, training and lifelong learning, high-risk activities, injury prevention by campaigns and methods, and approaches to labor inspection; emerging topics and future trends being brought by the most recent industrial revolution, including Safety II, digitalization and new human-machine relationships. [...]For further reading, please follow the link to the Special Issue Website at: https://www.mdpi.com/journal/safety/special_issues/WoS_2022
