# Message from the Editor-in-Chief

*Sci* (ISSN 2413-4155) is an innovative new international open access journal promoting openness and transparency in science. Published quarterly online and covering all fields of academic research, its aim is to accelerate the availability of manuscripts. *Sci* publishes articles immediately after basic editorial checks on Preprints, which allows open and active participation of the scientific community in evaluating and improving the quality of manuscripts. Furthermore, *Sci* offers the possibility to share Review Reports rendering them accessible in its pursuit of a more transparent publishing landscape. Such open and interactive community commenting provides a platform for critical assessment and exchange of ideas even after publication. The protection of the originality of authors is maintained by assigning a DOI upon publication on *Preprints*. We see *Sci* as a new step forward in scientific dissemination, a contribution to the future of publishing for the benefits of science and scientists, our response to a modern global scientific community, and a continuation of the path we have followed since our first journal was launched in 1996.

## Aims

*Sci* (ISSN 2413-4155) is a multidisciplinary, open access journal that aims to provide an advanced forum for researchers from the vast fields within life sciences, physical sciences, clinical medicine, sports sciences, materials sciences, computer sciences, environmental sciences and engineering to tackle the main challenges facing humankind today, such as those relating to energy, food, water, climate, and health. *Sci* also welcomes contributions from social sciences with implications related to its scope, as well as interdisciplinary works that involve aspects of both natural and social sciences. It publishes reviews, research papers, communications, case reports and short notes, as well as Special Issues.

The aim of *Sci* is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. Therefore, the journal has no restriction on the maximum length of the papers. Full experimental details should be provided so that the results can be reproduced.

Submissions selected for peer review will be posted on Preprints and will be available here on *Sci* for peer review. This will facilitate the rapid sharing of qualified and sound research results and encourage scholars to interact with each other efficiently, stimulating the development of research based on feedback.

## Scope

- Life and Physical Sciences
- Clinical Medicine
- Sports Sciences
- Material Sciences
- Computer Sciences and Mathematics
- Environmental and Earth Sciences
- Engineering
- Social Sciences

---

## Author Benefits

### Open Access

Unlimited and free access for readers

### Rapid Publication

A first decision is provided to authors approximately 37.1 days after submission; acceptance to publication is undertaken in 5.9 days (median values for papers published in this journal in the second half of 2024)
