Community Seed Banks

Message from the Guest Editor

Dear Colleague, Community seed banks are grassroot initiatives that store, maintain, and distribute seeds, particularly focusing on traditional and locally adapted varieties. By maintaining a wide array of genetic resources, community seed banks provide farmers with the options needed to adapt to changing climatic conditions and unforeseen agricultural challenges. In addition to their role in genetic conservation, community seed banks are instrumental in fostering socio-economic benefits. They enhance food security by ensuring the availability of diverse and resilient seeds, thereby reducing dependency on commercial seed markets and external inputs. The ecological benefits of community seed banks extend to sustainable agricultural practices. This Special Issue seeks to provide a comprehensive examination of community seed banks, highlighting their successes, challenges, and future prospects. Through a collection of research articles, case studies, and reviews, we aim to showcase the diverse experiences and insights from various regions and contexts.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Seeds* (ISSN 2674-1024). *Seeds* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on seed science. The scientific community and the general public can access the content free of charge as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Dr. José Antonio Hernández Cortés

Group of Fruit Biotechnology, Department of Fruit Breeding, CEBAS-CSIC, P.O. Box 164, 30100 Murcia, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, EBSCO, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 26.5 days after submission; acceptance to publication is undertaken in 5.4 days (median values for papers published in this journal in the first half of 2024).
