Antennas and Propagation for 5G and Beyond: From Ground to Space

Message from the Guest Editor

Next-generation communication standards such as 5G, B5G and 6G are among the most important technologies for the future. Advanced antenna and RF front-end systems are key technologies to meet the demanding requirements for next-generation communications. This Special Issue includes a broad research topic on sub-6GHz/mmWave technology for 5G, sub-THz technology for 6G antenna technology, and satellite antenna/RF system.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
