

Special Issue

Plasma Sensors and Their Applications

Message from the Guest Editor

Plasma Science and Engineering is a multidisciplinary area encompassing some of the most exciting fundamental and applied research themes in today's scientific landscape, with an extraordinarily broad impact in science, technology, and industry. Measuring the parameters of plasmas, usually termed as plasma diagnostics, is a key challenge in these applications, both for understanding the basic principles and, in many cases, for the optimization and control of processes. There are many different measurement and diagnostics systems to detect plasma parameters in magnetic confinement fusion devices, such as induction coils, CCD, laser-aided devices, spectroscopy, and microwaves, all of which are used for machine operation and physics analysis. Plasma diagnostics is based on a wide variety of characteristic plasma phenomena and, although most of the techniques used are already well established, it remains a highly challenging and fascinating discipline. This Special Issue will cover the methods, instruments, and experimental techniques used to measure the properties of plasma.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
