

Special Issue

Signal Processing for Wireless Sensor Networks and Communication System

Message from the Guest Editors

There is an increasing demand for advanced signal processing techniques for sensing and communications. Advanced machine-type communication techniques are needed to support massive wireless sensors with various delay and data rate requirements. Wireless sensors with more intelligence are also in demand. Integrated sensing and communication techniques, which integrate the two functions in one system, are also emerging as an attractive solution, achieving significant savings in terms of power consumption and device size and cost. We shall see an unprecedented revolution in our physical world for wireless devices and applications. This Special Issue seeks innovative digital signal processing solutions to important sensing and communication problems. The scope of this Special Issue includes (but is not limited to):

- Integrated sensing and communications;
- Millimetre wave radar signal processing techniques;
- RFID sensing and localization;
- Machine learning and pattern analysis techniques for wireless sensors;
- Signal processing for machine-type communications.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
