Special Issue

Fog/Edge Computing Cyber Security

Message from the Guest Editors

The rapid growth of resources and services that cloud systems offer has led to the creation of new computing and networking models (e.g., fog/edge computing). Fog and edge computing brings advanced computing, networking, and storage services closer to end devices. To address the arising cyber security challenges and opportunities in the design and implementation of this new computing infrastructure paradigm, this Special Issue seeks original, high-quality submissions in the domain of cyber security and cloud computing in distributed sensor networks with a particular focus on fog/edge computing. Both research and practical aspects of fog/edge computing security are of interest. Topics of interest include but are not limited to the following:

- AAA for DSN, fog, and cloud computing
- Data security and privacy on edge and cloud devices
- Fog computing for cyber security
- Intrusion detection for fog computing
- Key management in DSN and fog computing
- Physical security of edge/sensor devices
- Privacy-preserving data aggregation and computation for fog and cloud computing
- Security issues of DSN, fog, and cloud computing
- Security models for DSN, fog, and cloud computing

Guest Editors

Dr. Francisco J. Aparicio-Navarro

Faculty of Computing, Engineering and Media, De Montfort University, Leicester LE1 9BH, UK

Dr. Mustafa Kaiiali

School of Computer Science and Informatics, De Montfort University, Leicester LE1 9BH, UK

Deadline for manuscript submissions

closed (30 June 2022)

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro
Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
