

## Special Issue

# ECG Signal Processing and Analysis, Computational Technology and Applications

### Message from the Guest Editors

In the last decades, there have been vast improvements in the biomedical signal processing field thanks to the great advances in many technological fields such as electronics, communications, engineering, computational modeling, and machine learning. In particular, the techniques for the analysis of electrocardiographic signals (ECG) have notably improved and several of them have already been incorporated into ECG recording devices, facilitating their use by clinicians. The main topics for reviews and original research papers involved in this Special Issue focus on sensors and their application, including new methodologies, techniques, solutions and potential applications in the field of cardiac signal processing and simulation:

- ECG recordings with wearables: offline and real-time embedded signal processing techniques;
- In silico ECG simulations: from the ionic level up to the 3D thoracic volume;
- ECG ambulatory monitoring in diseased patients;
- ECG processing in extreme conditions such as hyperbaric environments or abnormal temperature and humidity contexts.

---

### Guest Editors

Dr. Carlos Sánchez

BSICoS Group, I3A Institute, IIS Aragón, University of Zaragoza, 50018 Zaragoza, Spain

Prof. Dr. Jan Cornelis

Department of Electronics and Informatics (ETRO), Vrije Universiteit Brussel, Pleinlaan 2, 1050 Brussel, Belgium

---

### Deadline for manuscript submissions

closed (20 July 2023)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
