

## Special Issue

# Selected Papers from the 13th International Workshop on Structural Health Monitoring (IWSHM 2021)

### Message from the Guest Editors

The 13th International Workshop on Structural Health Monitoring will be held at Stanford University, CA, USA, from 7 to 9 December 2021. The workshop will feature reviews of SHM growth in the last two decades and the perspectives of future SHM directions in research and applications. Papers in support of autonomous and/or cyber-physical systems (CPSs) and the Industry Internet of Things (IIOT) will be highlighted alongside general applications in aerospace, mechanical and civil infrastructure. This Special Issue is cooperating with the 13th IWSHM. Authors of outstanding papers related to novel “smart” sensors, sensors for extreme environments, MEMS/NEMS sensors, fiber optics, piezoelectric, magneto-electric sensors, CNT sensors, etc., presented at the workshop are invited to submit extended versions of their work to the Special Issue for publication.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.
