

## Special Issue

# Nanomaterials as Key for Next Generation Sensors

### Message from the Guest Editors

With the advances of nanotechnology, the introduction of nanomaterials as sensing elements into the existing sensor technologies that have been developed for decades have contributed to an impressive increase in the sensitivity. With various electrical and optical properties and geometries, low-dimensional structures, such as wires, tubes, flakes, fibers, etc., represent unique opportunities by providing thickness and lateral dimensions similar to those of target (bio)chemical species. The tuning of their composition and surface modifications further widen the possible applications. In this Special Issue, we want to highlight the most recent advances in the development of new nanomaterials, the modification of existing ones, or their innovative and alternative use in sensing applications.

- low-dimensional structures
- materials research
- nanomaterials
- nanosensors
- 2D materials
- nanowires
- nanotubes
- graphene

---

### Guest Editors

Dr. Bergoi Ibarlucea

Chair of Materials Science and Nanotechnology, TU Dresden, 01062 Dresden, Germany

Prof. Dr. Gianarelio Cuniberti

Technische Universität Dresden, Dresden, Germany

---

### Deadline for manuscript submissions

closed (31 December 2020)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

---

### Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
