

Special Issue

Sensors and Signal Analysis for Dynamic Measurement in Industrial Process

Message from the Guest Editors

Dynamic measurement is critical to the system design, optimal control, status or safety monitoring, energy conservation and emission reduction of industrial processes. Increasing attention is being paid to dynamic measurement techniques for its complexity, time-varying property, and intractable nature. This Special Issue focuses on the sensors and signal analysis for dynamic measurement in industrial processes, which aims to promote the theoretical development and technical advancement of process measurement in industry, including new sensing techniques and measurement methods, novel sensor design and system development, advanced signal analysis and processing, etc. We invite contributions in relation to the following topics, which include, but are not limited to:

- The novel design of industrial sensors or sensor systems.
- Tomography and imaging sensors.
- Localization and object-tracking sensors.
- Sensors in multiphase flow measurement.
- Structural health-monitoring sensors.
- Dynamic image reconstruction techniques.
- Signal analysis and the modeling of industrial sensors.
- Signal processing and data fusion for process measurement.

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
