

## Special Issue

# Unmanned Aerial Systems and Remote Sensing

### Message from the Guest Editors

Unmanned aerial system (UAS) applications have become an expanded area in remote sensing in the last decade. Advances and developments in unmanned aerial vehicle (UAV) platforms, sensors, and image processing have resulted in increasing use of this technology in the remote sensing community. This Special Issue focuses on UAS and Remote Sensing and its scope includes descriptions of processing algorithms/methodologies, as well as the interpretation of spatio-temporal agricultural, forestry, geological, ecological, environmental, and mapping, in general, using data from sensors on-board UAV. Contributions may focus on, but are not limited to the following:

- UAS sensor design
- Processing algorithms applied to UAS-based imagery datasets
- Radiometric and spectral calibration of UAS-based sensors
- UAS-based: RGB, multispectral, hyperspectral, and thermal imaging
- UAS-based LiDAR
- UAS-based monitoring
- Artificial intelligence strategies: classification, object detection.

---

### Guest Editors

Dr. José Emilio Meroño de Larriva

Department of Graphic and Geomatic Engineering, University of Córdoba, 14071 Córdoba, Spain

Prof. Dr. Francisco Javier Mesas Carrascosa

Department of Graphic and Geometric Engineering, University of Córdoba, 14071 Córdoba, Spain

---

### Deadline for manuscript submissions

closed (31 December 2022)

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
