Special Issue

UAV Imagery for Engineering Applications Using Artificial Intelligence Techniques (UAV-Al)

Message from the Guest Editors

This Special Issue will focus on the development of UAV imagery for engineering applications using Artificial Intelligence techniques (UAV-AI). UAV-AI have the advantage of automatic processing, with short temporal information that can learn from the environment and past experiences and adapt to accommodate fastchanging environments and goals. Each task in a UAV-Al system is interesting and valuable in its own right, but building such a system can facilitate a fundamental shift in the way we see them for solving complex problems. There is a need for a UAV imaging platform which includes visual RGB, multispectral, hyperspectral, thermal IR, LiDAR, etc. and AI technologies in machine learning, specifically shallow artificial neural networks, deep learning neural networks, spiking neural networks, online learning, neurofuzzy networks, as well as gradient-free optimization techniques like genetic algorithms, ant colony optimization, cuckoo search algorithms, etc., in decision-making and modeling in various engineering applications. About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological

developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
