

Special Issue

Application of Wearable Technology for Neurological Conditions

Message from the Guest Editors

Dear colleagues, Wearable technology is revolutionizing healthcare, providing a more tailored approach to both disease diagnosis and management. Within neurological conditions, wearable technology can provide a cost-effective tool throughout the disease course, including diagnosis and rehabilitation. The uptake in the use of wearable technology by both patients and clinicians will have a huge impact on the future of healthcare. Wearable technology will help improve diagnosis, provide cost-effective and non-invasive assessment tools, increase specificity for diagnosis, monitor disease progression, and inform ongoing disease management. This Special Issue focuses on the use of wearable technology within neurological conditions. We encourage the submission of papers that focus on the use of wearable technology for diagnosis, disease management, and outcome measures within populations suffering from Parkinson's disease, dementia, multiple sclerosis, stroke, and spinal cord injury amongst others. We are also seeking submissions of manuscripts related to the keywords listed below. For detailed information, please visit [here](#).

Guest Editors

Dr. Rosie Morris

Department of Sport, Exercise and Rehabilitation, Northumbria University, Newcastle upon Tyne, UK

Dr. Silvia Del Din

Translational and Clinical Research Institute, Faculty of Medical Sciences, Newcastle University, Newcastle NE4 5TG, UK

Deadline for manuscript submissions

closed (31 December 2022)

About the Journal

Message from the Editor-in-Chief

Sensors is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
