

## Special Issue

# Advances in Laser-Based Gas Sensing Technologies

### Message from the Guest Editor

The rapid development of coherent and broadband light sources, optical and fiber-optics as well as electronics components has resulted in the rise of a broad range of their novel applications. One of those which has been an object of very intensive research carried on worldwide is laser spectroscopy for gas sensing. To date, laser-aided gas sensors have been constructed based on the use of clever measurement techniques, including TDLAS, WMS, PTS, QEPAS, CRDS, broadband optical frequency comb spectroscopy and many more. This Special Issue aims to summarize the state-of-the-art methods, solutions, materials and apparatus currently used in selective, sensitive and precise optical gas sensing. The main topics of the Special Issue are connected with:

- Photothermal spectroscopy;
- Photoacoustic spectroscopy;
- Dispersion spectroscopy;
- Optical frequency comb spectroscopy;
- Remote sensing;
- Tunable and wavelength modulation spectroscopy;
- Single-frequency and broadband laser sources;
- Novel materials for optical gas sensing;
- Microstructured optical fibers and waveguides;
- Photodetectors and spectrometers.

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

---

### Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
