

## Special Issue

# Advanced Interface Circuits for Sensor Systems

### Message from the Guest Editors

Sensors are widely used in healthcare, automobiles, consumer electronics, industrial applications, and so forth. With that demand, comes an expectation of high quality and intelligent sensor circuits. With the emergence of artificial intelligence (AI) Internet-of-Things (AI-IoT), this has posed further design criteria and constraints to the interface circuits that aim to enhance the detection capability through the assistance of AI. It turns out that the interface circuits, which may be coupled with intelligent peripheral support circuits, are to provide advanced features to meet high-performance-aware specifications or high-adaptability, etc. and, therefore, realize smart functions through smart program control. Potential topics of this special issue include, but are not limited to:

- High-performance interface circuits
- AI-IoT sensor circuit design and techniques
- Smart power management circuits for sensors
- Sensor circuits with configurable architectures
- Intelligent peripheral circuits for sensor circuits
- Software for sensor circuits
- Digital-assisted sensor circuits
- Data communication for sensor circuits

## About the Journal

### Message from the Editor-in-Chief

*Sensors* is a leading journal devoted to fast publication of the latest achievements of technological developments and scientific research in the huge area of physical, chemical and biochemical sensors, including remote sensing and sensor networks. Both experimental and theoretical papers are published, including all aspects of sensor design, technology, proof of concept and application. *Sensors* organizes Special Issues devoted to specific sensing areas and applications each year.

### Editor-in-Chief

Prof. Dr. Vittorio M. N. Passaro

Dipartimento di Ingegneria Elettrica e dell'Informazione (Department of Electrical and Information Engineering), Politecnico di Bari, Via Edoardo Orabona n. 4, 70125 Bari, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Inspec, Astrophysics Data System, and other databases.

#### Journal Rank:

JCR - Q2 (Chemistry, Analytical) / CiteScore - Q1 (Instrumentation)
